Features to Evaluate across all Electronic Cigarette Brands

What is the best electronic cigarette brand? The fact is that most e-cigarette models basically work the same way. In a nutshell, a battery powers an atomizer which vaporizes a nicotine/water solution that is inhaled by the user. The main differences between the e cigarette brands are in overall quality/dependability as well as special/extra features that may appeal to you depending on your personality and needs.

Personality / Look

The different e cigarette brands have different personalities. Most brands make their product look like a real cigarette. The cartridge is brown to look like a filter, the battery is made to look like the main body of a tobacco cigarette and the end will even glow red when you inhale to add to a realistic smoking experience.

For smokers who are looking to express their individuality a bit more, you can choose from a variety of colors or exotic designs offered by many brands. Find the e cigarette that fits you the best. Do you rather *green-smoke* or *blu-smoke*? Do you want to be the *Vapor King*, be on *Cloud 9*, vape in *South Beach* style or be on the *Safe Cig* side?

30 Day Money Back Guarantee

If you are unsure about your switch to electronic cigarettes and you don't want to commit, then an electronic cigarette from a brand that offers a money back guarantee is probably a good choice.

Batteries

No matter what brand's starter kit you buy please make sure that it comes with two batteries. You need at least two batteries so one can charge while the other one is in use. For those who vape ecigs while working at the computer a direct USB power supply is an option. This way you won't have any battery issues. All reviews confirm this and most e cigarette brands offer starter kits with 2 batteries.

Blue, Red/Orange or Green LED

Why does the color matter? The red LED makes the e-cig look more like a traditional cigarette - that brings pros and cons. A simple fact is that electronic cigarettes do attract questions from other smokers.

When you e-smoke in public outside a bar, a restaurant, or the office then you will get less smokers asking you questions if you smoke an ecig with a red LED. But if you are very social and enjoy meeting people and/or you don't mind talking to strangers then an e-cigarette with a blue or green LED could be right for you.

If you decide to e-smoke inside a public place (your choice, we do not encourage you) then the e-cigarette with the blue or green LED will get you less trouble because it alleviates concerns onlookers may have. The e-cig with the red LED looks more like a tobacco cigarette while you inhale and may get you in trouble :) It is your choice.

2 or 3 Piece e-Cigarette

A 2 piece e-cigarette consists of the battery piece and a cartridge. In this case the atomizer is contained within the cartridge (also known as cartomizer). A 3 piece electronic cigarette consists of the battery piece, an atomizer and a cartridge.

2 piece

- Each cartridge/cartomizer comes with a fresh and clean atomizer built in.
- No worries about cleanliness or atomizer performance decrease over time.
- No need to ever buy a new atomizer.

3 piece

- Atomizer is of better quality and comes with warranty.
- Refill cartridges are cheaper (some by more than 50%).
- New atomizer costs about \$10. So you could get a new atomizer with every 10 cartridges and still save money.
- Recommended to those who want to refill cartridges.

Refill e-Cigarette Cartridges

You can buy smoke juice and refill cartridges to save money. If you plan to refill cartridges then we recommend a 3 piece electronic cigarette. Atomizers from 2 piece electronic cigarettes are not built to last.

Vapor Volume

How much vapor you're able to get on one puff is a big deal for many smokers. Generally speaking, more volume equals a more satisfactory and realistic smoking experience. Expert vapors start with a short puff to heat up the atomizer followed by a longer drag.

Flavors

What is the best electronic cigarette flavor? Electronic cigarettes cartridges come in a wide variety of flavors. All electronic cigarette brands offer tobacco and menthol flavored cartridges. If you are into a very specific flavor then pick your brand accordingly or consider refilling cartridges with smoke juice having your flavor.

Electronic Cigarettes for Women

Many women want their electronic cigarette to be stylish or cute like a fashion accessory. They prefer electronic cigarettes with colors such as pink, red, or green. They also love the ones with a diamond crystal LED. Various vendors offer for example pink electronic cigarettes and a few sell those with crystal LEDs

The Price Tag

Prices for electronic cigarette starter kits range across brands from about \$60 to over \$200. But the starter kit only determines your initial cost. After a while you will have to buy refill cartridges. Here you need to look at the cost per cartridge but also understand for how long a cartridge lasts. The different electronic cigarette brands compare their cartridges to a number of traditional cigarettes or packs. For example, if one cartridge compares to a traditional pack, then this cartridge provides as many smokes as a traditional pack would have. The electronic cigarette reviews on this site prove it: the best e-cigarette does not have to be the most expensive one!
